

**General Description:**

The fun never ends at McWane Science Center, a nonprofit, hands-on discovery museum and IMAX® *Dome* Theater. Four floors of interactive exhibits celebrate science and wonder — from an amazing collection of dinosaurs, to innovative environmental showcases, imaginative early childhood playgrounds, and an awe-inspiring aquarium. The energy and excitement of discovery spring to life through an extensive lineup of science demonstrations performed daily by award-winning educators. The adventure intensifies in the IMAX® *Dome* Theater where wide-eyed visitors experience the sights and sounds of breath-taking films on a 5-story-tall screen surrounded by three tons of high-intensity speakers.

Designed to inspire a life-long love of learning, McWane Science Center has welcomed millions of visitors since opening its doors in 1998. Explorers of all ages flock year-round to see, to hear, to touch, and to experience the wonder of science in one of the South's most unique venues.
